KYCS-PMW3360 Breakout Board
BY KEYCAPSSS.COM

Pinout

RES = Chip reset(active low)

GND = Ground

MOT = Motion detect (active low interrupt line)
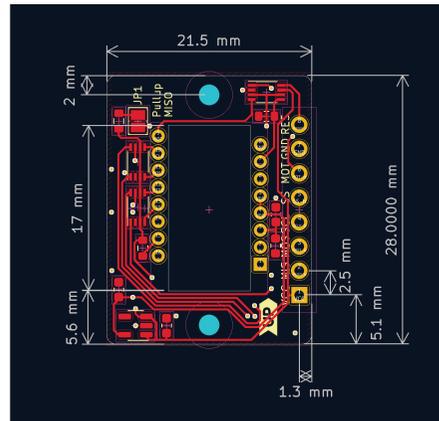

SS = Slave Select / Chip select (active low)

SCL = SPI/Serial data clock

MOS = MOSI

MIS = MISO

VCC = Input power supply (2-5.5V)
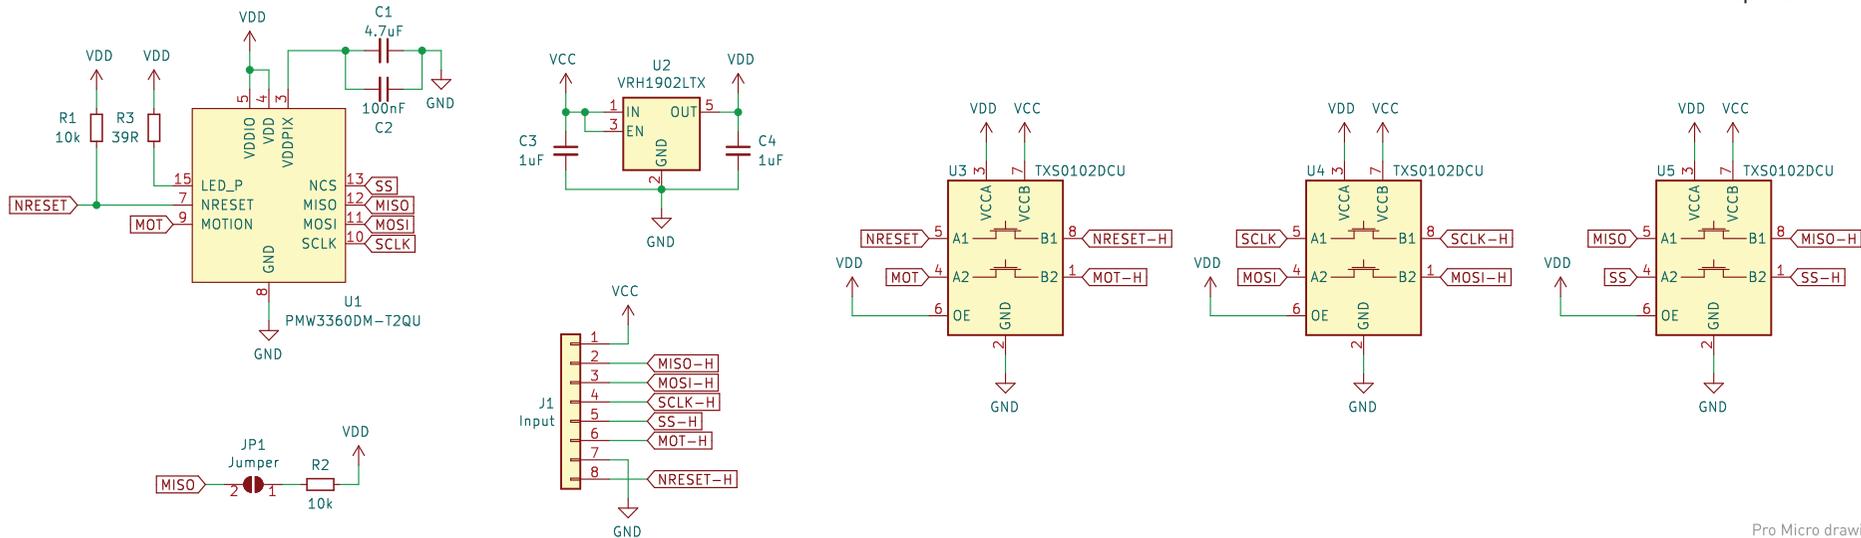

PCB dimension

Example connection with a Pro Micro/Puchi-C

Bridge JP1 to Pull MISO high

Optional: Pin 7 is interrupt 4 (INT6)

Schematic
